

Vulnerability Assessment Team

Kansas Homeland Security provides the state with a knowledgeable professional staff to go to sites identified as critical infrastructure by the State of Kansas or the federal government. This team works with federal, state, local agencies and private industries to build private/public partnerships by providing assessments focusing on site and asset hardening strategies.

Kansas Homeland Security provides assessments for publicly or privately controlled critical infrastructure and key resources:

- Agriculture and Food
- Chemical & Hazardous Materials Industry
- Defense Industrial Base
- Government Facilities
- Nuclear Power Plants
- Telecommunications
- Banking and Finance
- Critical Manufacturing
- Emergency Services
- Information Technology
- Postal & Shipping
- Transportation
- Commercial Assets
- Dams
- Energy
- National Monuments and Icons
- Public Health
- Water and Water Treatment Systems
- Educational Facilities
